

DOUBLE GUARD® SPROCKET-NOSE BARS

An Oregon® Double Guard® sprocket-nose bar is the superior bar for occasional chainsaw users, such as homeowners or campers. Commercial users as well, such as arborists or farmers, may also find these bars to be an excellent choice. Double Guard® bars take their name from the fact that they are reduced-kickback bars. They help guard the operator from injury by reducing the level of kickback energies. Oregon® Double Guard® bars are identified and sold according to chain pitch. They are also available in models with Intenz®, the advanced tensioning system that's built right into the bar itself. See the chart on the back of this page for recommended saw sizes, available lengths, and available motor mounts for each type of Double Guard® bar.

For use with 1/4"-pitch chain

For use with 3/8"-pitch 91-series chains

For use with .325"-pitch chain

For use with 3/8"-pitch 72/73/75-series chains

FEATURES

- Super slim shape
- Sprocket-nose bar (vs. solid-nose bar)
- Patented Cradle™ nose-sprocket design 
- Nose-sprocket components are made from the same durable alloys as our pro bars
- Upgraded nose rivets on Double Guard® "25" and "91" bars are longer, with wider heads
- Small-radius nose
- Available with the patented Intenz® built-in tensioning feature 

BENEFITS

- Lighter than standard bars of the same length; minimizes user fatigue (a Double Guard® 3/8" bar is 16% lighter than a competitive 3/8" 9-tooth bar)
- Excellent maneuverability; pinching and binding in the cut are minimized
- Specially tapered nose minimizes chain throwing
- Superior cutting performance; maximum power is available to the chain
- Reduced friction and longer chain life
- Sprocket-nose life is 150% to 300% longer than competitive bars
- Maximum nose life and longer overall bar life
- Reliable trouble-free performance
- Rivet upgrade increases nose strength by 30%
- Excellent wear resistance, fewer nose failures
- Kickback is reduced 15% to 50% when compared to standard-size noses
- Double Guard® bars meet the ANSI B175.1 definition of a reduced-kickback bar
- Faster, easier chain tensioning from the side of the saw

Double Guard® F&B A107077 AC 0601

Oregon® Double Guard® bars are intended primarily for occasional users such as homeowners and campers, but they may also be an effective, economical bar for commercial woodcutters such as arborists, utility workers, landscapers, or farmers.

OREGON® DOUBLE GUARD® BAR SPECIFICATIONS

Chain Pitch	Available Bar Lengths	Recommended Saw Sizes	Nose-sprocket Tooth Count	Available Motor Mounts
Double Guard® 25 Bars				
1/4"	12" - 14" (30-36cm)	Up to 2.3 cu. in. (38cc & smaller)	10	A041
Double Guard® .325" Bars				
.325"	16" - 20" (40-50cm)	2.3-3.5 cu. in. (38-58cc)	10	D176, K041, K095
Double Guard® .325" Intenz® Bars ("T" motor mounts)				
.325"	16" - 20" (40-50cm)	2.3-3.5 cu. in. (38-58cc)	10	T041
Double Guard® 91 Bars				
3/8" (91 chains)	10" - 18" (25-45cm)	Electric, or up to 2.5 cu. in. (41cc & smaller)	7	A041, A061, A074, A089, A218, A318
Double Guard® 91 Intenz® Bars ("T" motor mounts)				
3/8" (91 chains)	10" - 18" (25-45cm)	Electric, or up to 2.5 cu. in. (41cc & smaller)	7	T041, T061, T074, T095, T218, T318
Double Guard® 3/8" Bars				
3/8" (72 chains)	16" - 20" (40-50cm)	2.5-3.5 cu. in. (41-58cc)	9	D096, D176, K095
For specific bar part numbers and fit up, see the current Oregon® Application Guide, website, or contact your authorized Oregon® distributor.				

GENERAL APPLICATIONS, BY MOTOR MOUNT	
Motor Mount Number	Fits certain models of these saw brands:
A041, K041, or T041	Allis Chalmers, Dayton, Dolmar, Echo, Green Machine, Homelite, Husqvarna, John Deere, Jonsered, Makita, Poulan, Poulan Pro, Redmax, Sears, Shindaiwa, Skil, Tanaka, Tensen, Toro, Western Auto
A061, T061	Homelite
A074, T074	Olympyk, Stihl
A089	Remington
K095, T095	Alpina/Castor, Dolmar, Homelite, Husqvarna, Jonsered, Makita, McCulloch, Olympyk, Partner, Pioneer, Poulan, Poulan Pro, Redmax, Solo, Stanley
A218, T218	Alpina/Castor, Black & Decker, Dayton, Montgomery Ward, Power Pruner
A318, T318	McCulloch, Remington
D096	<i>Double Guard® 3/8" bars only</i> Alpina/Castor, Echo, Homelite, Jonsered, Olympyk, Poulan, Poulan Pro, Remington
D176	Allis Chalmers, Dayton, Echo, Fairmont, Green Machine, John Deere, Lombard, McCulloch, Montgomery Ward, Poulan, Poulan Pro, Redmax, Sears, Skil, Tanaka, Western Auto

ABOUT THE INTENZ® BUILT-IN TENSIONING SYSTEM

Intenz® is a fool-proof system of rack-and-pinion gears that is built into selected Oregon® bars. Intenz® makes it easier and faster to tension the chain from the side of the saw. Simple removal of the saw's standard tension-adjustment pins is required.

ABOUT DOUBLE GUARD® BARS AND BAR-NOSE TIP GUARDS

When replacing the bar on a saw originally equipped with a bar-nose tip guard, Oregon® recommends that a bar with Guard Mate® holes be used and that the bar-nose tip guard be reinstalled. Such saws, when used without their bar-nose tip guard, pose an increased risk of kickback that could result in serious injury to the saw operator or bystanders.

Bar Type	Guard Mate® Bar-nose Tip Guard P/N
Double Guard® .325" Double Guard® 3/8"	33810
Double Guard® 91	33812
Double Guard® 25 bars do not have Guard Mate® holes.	

REPLACEMENT GUIDE BARS AND THE ANSI SAFETY STANDARD

Saws under 3.8 cubic inches (62cc) must meet ANSI low-kickback performance requirements. These saws carry an original-equipment label indicating compliance. In order to maintain compliance, replacement guide bars installed on these saws must have a nose size (radius) equal to or smaller than the original-equipment nose.
